

OnlyNative Food Hygiene SOP

Document ID	ON-SOP-0001
Version	2.0
Status	Approved
Access Level	Internal - Production

1. Clean kitchen/work surfaces before production.
2. Wash hands before food preparation and after breaks; use both hand wash and sanitizer.
3. Head caps, gloves and aprons are mandatory.
4. Visually inspect raw materials for quality, expiry, contamination, insects, smell or other problems before use.
5. Current ingredients do not require refrigeration; store them appropriately in the designated dry storage environment.
6. Clean utensils, trays, rolling surfaces, Native Sanch and frying equipment before and after production.
7. Refined frying oil is single-use only and must not be reused.
8. After frying, cool products under a fan while covered/protected with a thin net cloth.
9. Wear gloves during packaging. Keep packaging materials sealed and clean before use.
10. Perform pest control once per month.
11. Use RO water for dough preparation.
12. Clean the kitchen every day.
13. The supervisor may reject a batch that looks, smells, tastes or cooks incorrectly.
14. Hygiene compliance is overseen by both the owner and supervisor.
15. A formal compliant used-oil disposal procedure still requires definition; drain disposal is not encoded as an approved SOP practice.
