

OnlyNative Packaging SOP

Document ID	ON-SOP-0003
Version	2.0
Status	Approved
Access Level	Internal - Production

1. Use food-grade containers for current products.
2. The standard pack size for current products is 200 g.
3. Each finished pack is weighed to verify the required 200 g quantity before final sealing.
4. Packages are manually sealed.
5. Every package receives a product label.
6. Labels include product name, weight, packed/manufacturing date, best-before/shelf-life information, ingredients, price, OnlyNative branding, contact information and batch number.
7. Finished packs are stored on shelves in the store room before dispatch.
8. Visually inspect packages for leakage, damage and seal problems.
9. For orders containing multiple products, place individual packs in an outer bag or box.
10. Special packaging is used for bulk/festival orders.
11. Final packaging and dispatch checks are performed jointly by the owner and supervisor.
