

OnlyNative Quality Control SOP

Document ID	ON-SOP-0002
Version	2.0
Status	Approved
Access Level	Internal - Production

1. Owner and supervisor approve or reject incoming ingredients.
2. Employees must follow the exact approved recipe quantities documented for each product.
3. Every batch is prepared under supervisor observation.
4. A sample is tasted as part of batch quality approval.
5. Check colour, shape, size, texture/crispness and whether the product is properly fried.
6. Use Native Sanch for the approved traditional Thekua appearance.
7. Check Gujiya sealing to ensure filling does not come out during frying.
8. Verify each standard finished pack is 200 g before final sealing.
9. Remove burnt, broken, undercooked, overcooked or improperly shaped pieces before packing.
10. Rejected batches are discarded and must never be sold.
11. Inspect package seal integrity before dispatch.
12. Final batch approval is performed jointly by the owner and supervisor.
13. Batch numbers are currently used on product packaging. A fuller production/batch record system is not yet maintained.
14. Quality complaints should be recorded with the goal of tracing issues to production batches; fuller traceability is a planned capability.
